

GPD100H Portable Chain Feeds Drilling Machine

Description

GPD100H is portable hydraulic chain feed drilling machine, ideal for all handy drilling work; It can be used with down-the-hole hammer and drill hammer as well as for core drilling. Designed for easy mounting on any type of scaffolding and suitable for wall work. Very light and handy.

Application

Hydraulic portable chain feed drilling machine is widely used for the below project:

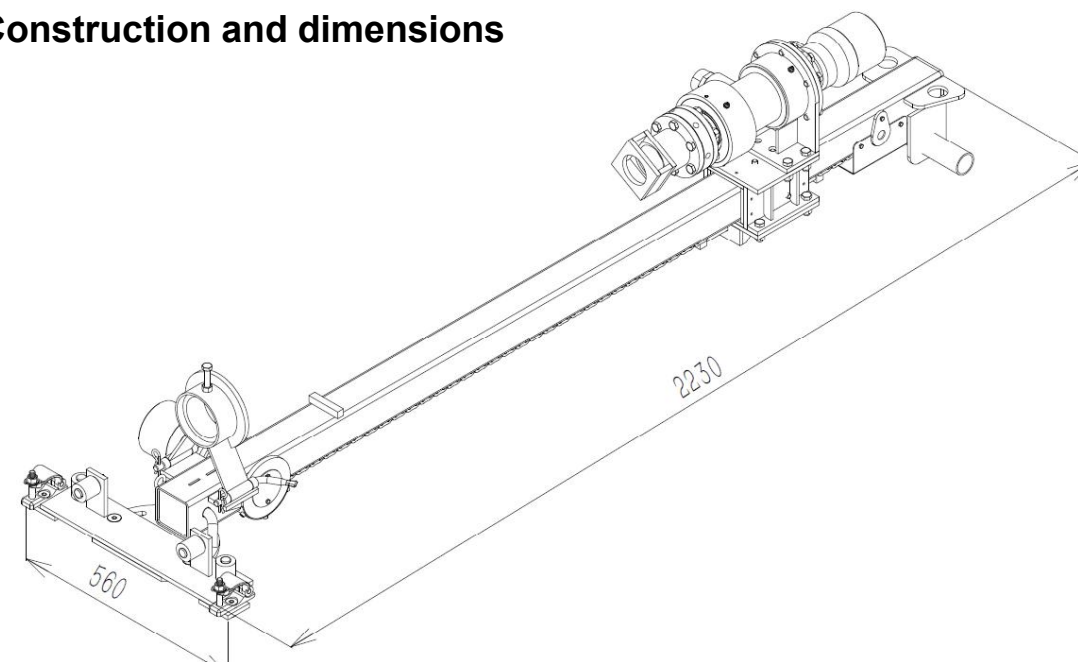

- Nailing
- Blast Holes
- Micropiles
- Core Drilling
- Exploratory Drilling
- Diamond Drilling

Technical Data

Model	GPD100H
Hole Diameter	80~120mm
Hole Depth	30m
Feed Force	12KN
Rotate Speed	90~120rpm
Torque	1000NM
Air Pressure	0.5~0.7Mpa
Air consumption	7~8m3/min
Single feeding distance	1m
Drilling Direction	Any Angle
Weight	86Kg (Only drill machine)
Dimension	2230x560x415mm

Construction and dimensions

Super portable, super lightweight
