

# GMA1500-1200-E Turbo Mixer/Agitator

*Copyright© Zhengzhou Gaode Equipment Co.,Ltd.*

Product description

GMA1500-1200E Turbo Mixer/Agitator is combination consist of a steel sheet cylindrical mixer tank heavy-duty slurry pump and agitator tank, set-up on a strong base frame. This product is equipped with an automatic control system that can automatically control the operation of the equipment. The slurry is mixed through a high speed vortex produced by a special pump which, after sucking the material from the bottom of the mixer tank, sends it back tangentially into the same tank in order to get highest possible efficiency. By this process it is possible to obtain homogeneous colloidal and high quality mixtures within a very short period of time.

After mixing, the mixtures are pumped into the agitator tank with slow speed mixing paddles by the above same pump.

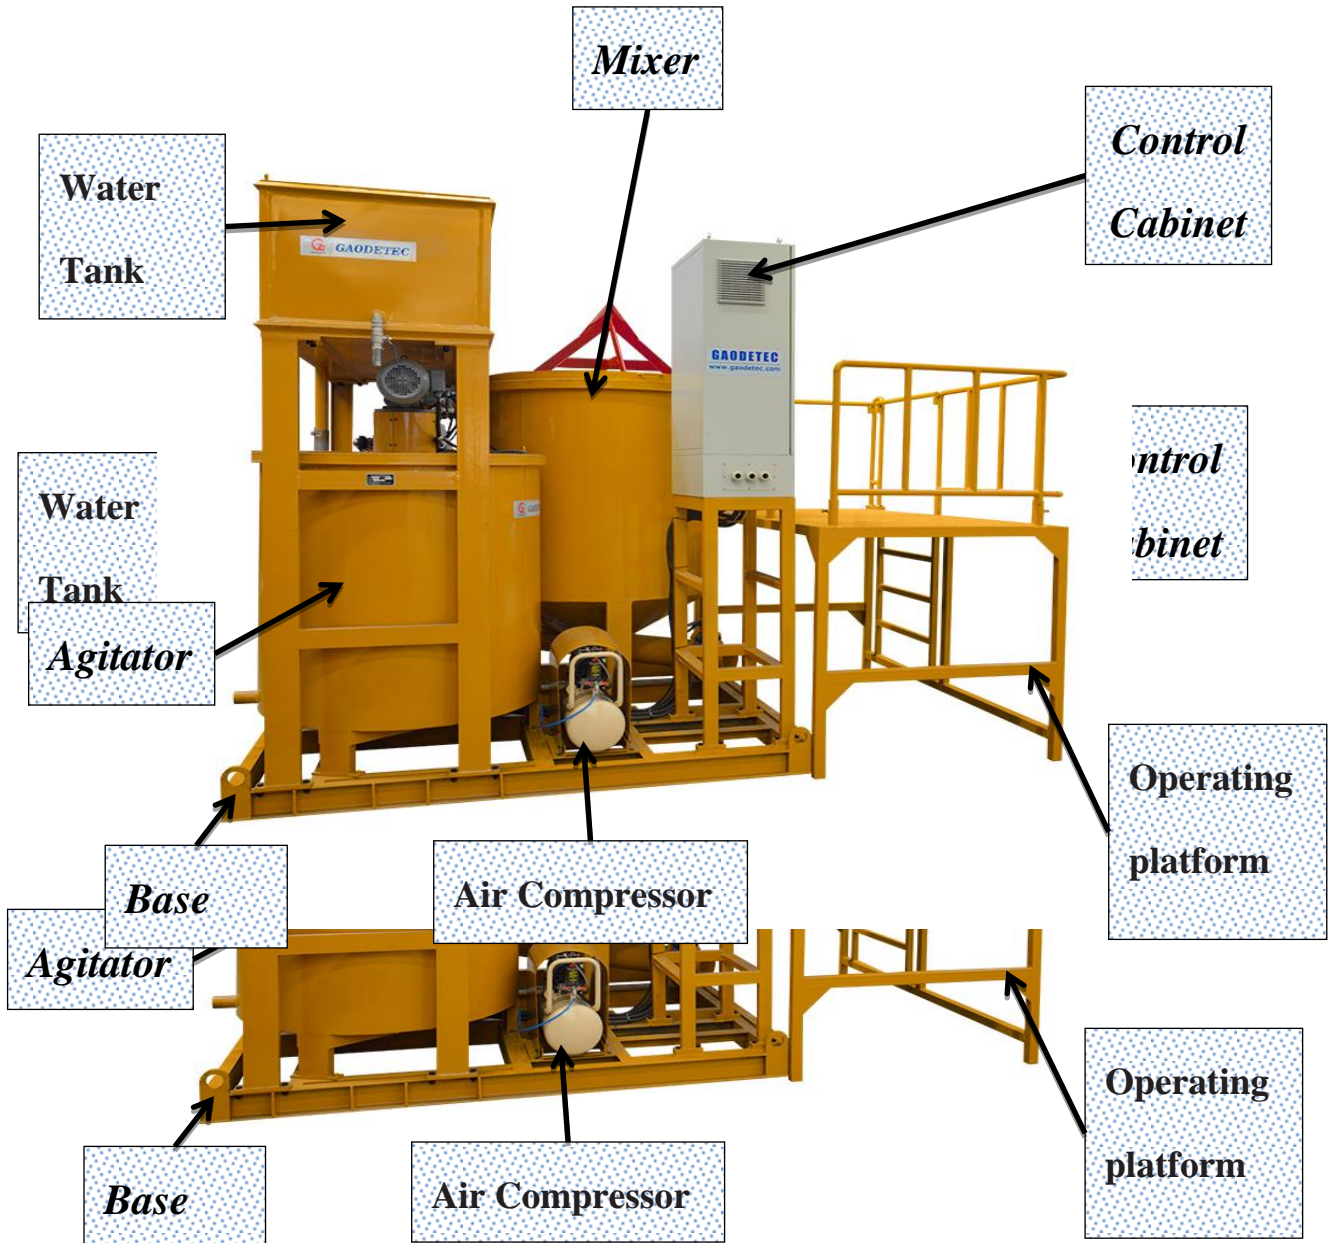

When all the mixture in the mixing tank is pumped out, press the discharge completion button to start the next cycle of pulping.

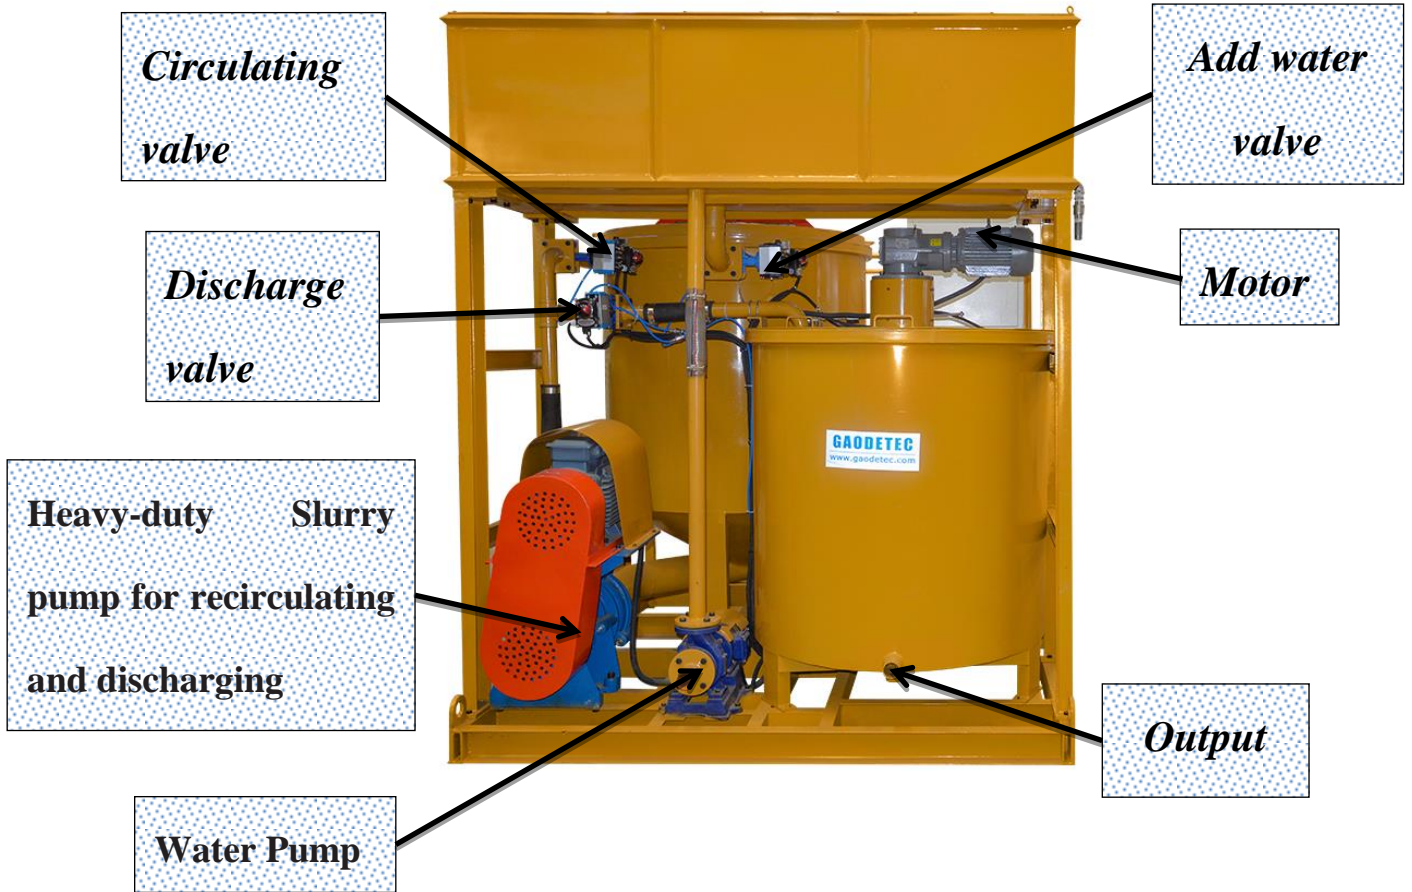

**Main Features:**

- Automatic control, simple operation, saving labor, great reliability;
- High speed mixing and high efficiency to achieve continuous mixing;
- Simple structure, easy assemble;
- Less spare parts, low maintenance;

**Technical Parameter**

Model		GMA1500/1200E
Output		15~18m3/h
Mixer Volume		1500L
Agitator Volume		1200L
Motor Power		15+3 Kw
Mixer/Agitator	Dimension	2230×2340×2630mm
	Weight	2230kg
Operating platform	Dimension	2210×1200×2010mm
	Weight	220kg
We reserve the right to change technical specifications without prior notice		

**Electric cabinet**

**Touch screen Intelligent control equipment**
