

GD-N2 Plastering Machine

GD-N2 plastering machine is a small-size, dry-mixed mortar transfer pump, which is suitable for materials less than 3mm, such as mortar that can be pumped, putty, paint, coating materials and things alike. GD-N2 can be your spraying machine if it is equipped with our small-size air compressor, spray gun or relative accessories.

GD-N2 is composed of many independent components. The volume and handy design facilitate the transportation of the machine.

Specification:

Model	GD-N2
Voltage	380V
Motor power	4kw
Conveying capacity	40L/min
Conveying pressure	30bar
Conveying distance	0-100m
Conveying height	50m
Spraying pipe	100m
Max. aggregate	4mm
Stir manner	Manual
Total weight	245kg

Overview

- 1. Motor and transmission(4KW)
- 2. Material hopper
- 3. pump core

- 4. Machine frame
- 5. Control box
- 6. Air pump

Our certification

Overview of electricity box

- 1. master switch of rotation direction
- 2. hand/ autom ,motor selector
- 3. indicator of motor rotation /wiring error
- 4.electric box lock
- 5.hand/autom ,air pump selector

- 1. air pump socket
- 2. electric motor socket

- 3. air pump pressure control socket
- 4. power supply socket

In the view of electricity box
